

Erie County has joined the Buffalo Niagara Partnership and other local chambers, economic development entities and local governments to conduct the **WNY COVID-19 Business Impact Survey**. This survey is designed to assess the pandemic's impact on Western New York businesses and should take no more than 10 minutes to complete. All respondents' information will be confidential and only aggregate data will be shared.

The information gathered from the survey is essential to assisting Erie County to better understand where your greatest needs are and how we, together with our survey partners, can best address potential gaps in available resources.

While the survey is confidential, there is an opportunity at the end of the survey for you to request information on resources and/or volunteer your company's expertise to assist other Western New York businesses in recovery.

To request a survey, click here: Thepartnership.org/impactsurvey

Thank you for taking the time to complete the survey with the most accurate information as you can provide. We understand how fluid this situation is and appreciate your best effort. Now more than ever, real world data and insights from the business community have the power to inform necessary decisions in both the public and private sectors.
